

REMARKS

This is in response to the Office Action of December 11, 2002. In the Office Action, a restriction to one of Group I, claims 1 thru 22; or Group II, claims 23-40, was required.

By this response, Applicant elects the invention of Group I, claims 1-22, with traverse.

Claims 4 and 14 have now been amended, and include the recitation of an internal flow passage through the collar, to fluidly connect the central chamber in the body with the canister. It is thereby respectfully submitted that the combination as thereby claimed requires the particulars of the subcombination for patentability.

It is also submitted that a proper search of the invention of Group I, claims 1-22, should necessarily require a search in the indicator class of Group II.

Reconsideration of the restriction requirement, and examination of all the claims currently pending in the application, is respectfully requested.

A clean copy of the claims is attached hereto.

Respectfully submitted,

Christopher H. Hunter, Reg. 34,187

Attorney for Applicant
